-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Specification

The abstract of the disclosure is objected to because the term "barcode" is a misspelling. Webster's Dictionary only defines the term –bar code-. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 6 and 7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 6 and 7 recite the term "barcode", however this should be two words –bar code-.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation

under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1, 3-14, and 16-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over US20040134983A1 to Oyama et al in view of USPN 6,018,860 to Smith et al in view of USPN 6,341,009 to O'Connor et al.

The substantial limitations are disclosed by Oyama et al.

Smith et al describe (Figures 16 and 17 and column 19) well known plural inspection stations.

O'Connor et al describe (column 11, lines 4-28) well known first and second camera for different tasks.

The instant claimed systems and methods would have been obvious at the time applicant's invention was made to a person having ordinary skill in the art because automated inspection provides efficient processing.

Claims 2 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over US20040134983A1 to Oyama et al in view of USPN 6,018,860 to Smith et al in view of USPN 6,341,009 to O'Connor et al as applied to claims 1 and 13 above, and further in view of USPN 5,304,773 to Kilian et al.

Kilian et al describe old and well known xyz laser movement and the use thereof in a marking arrangement would have been obvious at the time applicant's invention

was made to a person having ordinary skill in the art because the xyz movement provides rapid processing.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
